

Feature Test Plan

Prove your feature works before you demo it. Try to break it on purpose.

Feature: _____ Name(s): _____

Test ideas — pick at least 3

Leave every field empty and click the button · Enter a negative number · Enter a decimal · Enter a huge number · Enter letters instead of numbers · A value where the goal is already met · Click the button twice

1 Test case 1

☐ Works ☐ Problem found

What are you testing?

What you expected	What actually happened
_____	_____

2 Test case 2

☐ Works ☐ Problem found

What are you testing?

What you expected	What actually happened
_____	_____

3 Test case 3

☐ Works ☐ Problem found

What are you testing?

What you expected	What actually happened
_____	_____

4 Test case 4

☐ Works ☐ Problem found

What are you testing?

What you expected	What actually happened
_____	_____

5 Test case 5

☐ Works ☐ Problem found

What are you testing?

What you expected

What actually happened

 Ready to demo?

- ☐ No red errors in the console (press F12 to check)
- ☐ Tested with real, sensible numbers — not just placeholders
- ☐ Tested at least one edge case from the ideas above
- ☐ I can explain every line of code I've written
- ☐ I've run through my demo once, start to finish

Found a bug in your own feature while testing? That's a good thing — fix it now, before the demo, not during it.
