

Pre-Flight Checklist

Do this the morning of — before a single student walks in

The room

- ☐ Arrive at least 30 minutes early
- ☐ Projector on, connected, and actually showing your laptop screen
- ☐ Wifi connected and confirmed fast enough to load a Codespace
- ☐ Power for your laptop, plus a backup charger if you have one

Your own setup

- ☐ Your repo URL written on the board / slide / somewhere visible all day
- ☐ Open a fresh Codespace yourself, right now, and confirm it loads
- ☐ Ask Copilot Chat "Who are you?" — confirm Nova responds correctly, not generically
- ☐ Confirm `challenge.js` is in the repo with the buggy function inside
- ☐ Confirm Live Server opens the dashboard preview without errors

Printed materials — physically in your hand

- ☐ Master Script (or Session Day Script)
- ☐ Timed Agenda — one glance, whole day
- ☐ Troubleshooting Card
- ☐ Bug Cheat Sheet
- ☐ Student Roster — names filled in if you know them in advance
- ☐ Progress Tracker — blank, ready to fill in live
- ☐ Prompts Cheat Sheet
- ☐ "If It All Falls Apart" page

On-screen files ready to open

☐

`bug-hunt-screen.html`, `level-up-screen.html`, `brainstorm-screen.html`, `milestone-screen.html` — all open in browser tabs, in order, ready to switch between

You

☐

Water nearby

☐

You've already run the tutorials yourself, at least once, before today

☐

You remember: nothing here can be permanently broken, and every problem you've hit already has a written fix

If everything above is ticked, you are ready. That's not reassurance — it's the actual, literal state of things.
